Fail

Activity 2:

Bugs reports:

1. Title: Does not give empty field error
Steps: enter empty username or password
Expected: gives error that empty field has been entered and to enter correct username/password
Actual: gives invalid authentication error
Severity: Low
2. Title: Does not send email verification
Steps: signup with valid information and email verification should be sent to email
Expected: after verifying redirect to home screen
Actual: does not send email verification
Severity: medium

Code review and code smells:

1. Issue: `<br></br>` tags
Location: Login/page.tsx and Signup/page.tsx
Problem: makes the code messy
Suggested fix: use margin and padding instead
2. Issue: repeated class names ("InputFields" and "buttons")
Location: Login/page.tsx and Signup/page.tsx
Problem: If we want to edit the styling we will have to change it in multiple places
Suggested fix: Use tailwind css
